

Student Life at Calbright

Online learning doesn't have to be distant or impersonal. Calbright puts students at the center of the College's design and decision making, and each student works directly with their personal success counselor to establish goals and an achievement plan that fits within their life and priorities.

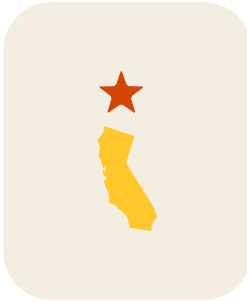

Career Services

Calbright's team of career services counselors and coaches provide hands-on support to students in their journey to a new career, offering:

- Career writing and effective communication support for resumes and cover letters
- Practice interview sessions
- LinkedIn profile-building expertise
- Virtual employee panels
- Networking skills
- Employer/internship research and job search assistance

Tutoring Services

Academic tutors are part of Calbright's support services and provide an informal venue for students to receive help on a particular module or subject area. Our success team and instructors are never more than a click away and check in regularly with students.

Online College Can Work For You

"I have quite a bit of experience with online learning and training, and Calbright's classes are really good, really enjoyable, and the staff were all great. I really enjoyed being able to get in there and go at my own pace. And when I graduated, Calbright's career services helped me rewrite my resume to get a job."

- David, Calbright Graduate

Start Here, Succeed Anywhere.

Calbright's flexibly paced programs help students develop the skills needed for in-demand jobs, on a learner's timeline, with tuition and fees currently free for adult Californians.

Whatever program you choose, the Calbright curriculum always begins with you.

We’re built for working adults and nontraditional students.

We offer Californians an on-ramp to a better career, making education easy to access, and providing a supportive community in which to learn the right skills.

We are committed to your success.

Competency-Based Education

Our Competency-Based Education model means students move ahead based on what they know, instead of the number of hours spent in a classroom. Learners can move as quickly as they are able, while taking the time they need.

Training built for you.

Whether you’re transitioning into a new industry or moving up in your current field, take only the classes you need, on your timeline.

No Student Debt

All Calbright programs are currently free for Californians.

Online

Calbright is California’s first exclusively online community college.

Set Your Pace

You can earn your Calbright certificate at your own pace.

Flexible Support

You’ll have your own success coach, academic advisor, career counselor, and instructors committed to your progress.

Job-Focused

We design our programs with input from California employers looking to hire for great positions.

Discover Your Calbright Experience

Whether you’re transitioning into a new industry or moving up in your current field, take only the classes you need, on your timeline.

Our programs prepare you to earn industry-recognized certifications (such as the CompTIA A+, Security+, and Salesforce Certified Administrator credentials) that companies in growing sectors are looking for.

Learn more and find the right program for your career goals.

Our Programs

- Information Technology Support
- Cybersecurity*
- CRM Platform Administration
- Data Analysis

***Note: Programs may require prerequisites for enrollment or have limited seats and availability. While Calbright programs are flexibly paced, enrollment agreements are limited in duration. Students are enrolled in successive 6-month terms for a maximum program length of three years.**
